

2020 AMC 10A Problem 2 - Solution

Review the full statement and step-by-step solution for 2020 AMC 10A Problem 2. Great practice for AMC 10, AMC 12, AIME, and other math contests

2020 AMC 10A Problem 2

Problem:

The numbers 3, 5, 7, a , and b have an average (arithmetic mean) of 15. What is the average of a and b ?

Answer Choices:

- A. 0
- B. 15
- C. 30
- D. 45
- E. 60

Solution:

The arithmetic mean of the numbers 3, 5, 7, a , and b is equal to

$$\frac{3 + 5 + 7 + a + b}{5} = \frac{15 + a + b}{5} = 15$$

Solving for $a + b$, we get

$$a + b = 60$$

Dividing by 2 to find the average of the two numbers a and b gives

$$\frac{60}{2} = \boxed{(C) 30}.$$
